QUIZ 4 - ICS 415 Fall 2017

Today we finished covering JavaScript basics.

Below, complete the `ask()` JavaScript function, that asks the user for a Hawaii ZIP Code (using the `prompt` method) and then fills in the `div` element (`output`) with the city and the county of the ZIP Code, as well as all the other ZIP Codes that are also in that city. Use <http://ics415.com/assignments/zipArray.js> to match up ZIP Codes with cities and counties.

```
<!doctype html>
<html>
<head>
<title>Hawaii City ZIP Codes</title>
<script type="text/javascript"
src="https://ics415.com/assignments/zipArray.js"></script>
<script>
function ask()
{

}
</script>
</head>
<body>
<input type="button" value="Press Here" onclick="ask()">
<div id="output"></div>
</body>
</html>
```
