QUIZ 12 - ICS 415 Fall 2017

Today we digressed and learned more about cPanel and the site software plugin Softaculous. Your quiz today is "hands-on."

You will prepare your class website so I can grade your past and future assignments simply by visiting your website.

1. Install WordPress in the root directory of your class website.

2. Make the Title and Sub-title appropriate.

3. Create a static home page.

4. Create a menu that has the home page link and external assignment links for your assignments.

I will grade your quiz by visiting your website from the class Websites link.
